**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 – 3 and 18 are rejected under 35 U.S.C. 102(a) as being anticipated by Mimino et al.

Mimino et al., U.S. patent No. 6747299, discloses a high frequency semiconductor device. As shown in figure 3, a semiconductor device comprises a power supply wiring 7 and a ground wiring 3. An insulating film 6 is interposed between power supply wiring 7 and ground wiring 3. Line 58 describes the selection of insulating layer 6 materials with a dielectric constant that enables noise to be reduced at high frequencies.

***Allowable Subject Matter***

Claims 5 – 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not teach or suggest the recited corrugated form.

Art Unit: 2822

Claims 12 – 17 and 19 – 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
